PROFESSIONAL SUMMARY

Software Engineering undergraduate at SLTC Research University with hands-on experience in frontend and backend development, RESTful API design, and database-driven applications. Completed a Backend Developer Internship at PURE HEART FAMILY (PVT) LTD, contributing to a multi-service Taxi, Delivery, and Marketplace platform using NestJS, PostgreSQL, Prisma ORM, and Swagger OpenAPI. Experienced in building responsive web applications with React.js and developing secure backend systems using modern authentication and database technologies. Seeking an Associate Software Engineer opportunity focused on Frontend Development.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Dart

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Flutter, Vite

Backend Development: Node.js, Express.js, NestJS, FastAPI, REST API Development

Databases: PostgreSQL, MongoDB, MySQL

ORM & API Tools: Prisma ORM, Swagger OpenAPI, Postman

Cloud & Deployment: Supabase, Firebase, Render, Vercel, DigitalOcean

Tools: Git, GitHub, VS Code

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Jul 2025 – Dec 2025

Western Lanka Technologies (Pvt) Ltd

- Developed and managed the company website from development to deployment.
- Maintained the company's online presence and digital platforms.
- Assisted with network configuration and IT infrastructure maintenance.
- Collaborated with internal teams to support business operations and digital services.
- Gained practical experience in web development, networking, and technical support.

Backend Developer Intern

Jan 2026 – May 2026

PURE HEART FAMILY (PVT) LTD (PV 00268418)

Project: **Ezy Map – Multi-Service Taxi, Delivery and Marketplace Platform**

- Developed backend services using NestJS and TypeScript for a multi-service Taxi, Delivery, and Marketplace platform.
- Designed and implemented RESTful APIs for core business functionalities.
- Built and managed relational database schemas using PostgreSQL and Prisma ORM.
- Implemented user authentication and authorization features including registration, login, and account status validation.
- Developed CRUD operations for Users, Drivers, Rides, Categories, and related modules.
- Created and maintained API documentation using Swagger OpenAPI.
- Performed database migrations, request validation, and API testing.
- Worked with Git-based version control and feature branch workflows in a collaborative development environment.
- Participated in backend architecture discussions and database design activities.

PROJECTS

KV Audio – Audio Equipment Rental Management Platform

GitHub: [Frontend](#) | [Backend](#)

- Developed a full-stack audio equipment rental platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Built responsive user interfaces with React.js and Vite, integrating RESTful APIs for seamless user experiences.
- Implemented secure authentication and authorization using JWT, bcrypt password hashing, middleware protection, and role-based access control (Admin/User).
- Developed features including user registration/login, item management, rental booking management, user management, and image uploads.
- Designed and implemented MongoDB database schemas and backend APIs with input validation and rate limiting mechanisms.
- Built an administrative dashboard for managing inventory, users, bookings, and platform operations.
- Deployed the frontend on Vercel and backend services on Render.

HealthBridge – Kidney Donor & Patient Matching System

GitHub: [Health_Bridge_App](#)

- Developed a cross-platform mobile application using Flutter to connect kidney donors with compatible patients.
- Implemented authentication and user role management using Firebase Authentication.
- Integrated backend APIs built with FastAPI for secure data processing.
- Utilized OCR technologies (OpenCV and Tesseract) to extract medical report data.
- Stored structured healthcare data using PostgreSQL.
- Collaborated within a team environment to deliver the solution.

GlobalBooks – Microservices Learning Project

GitHub: [globalbooks-soa-microservices](#)

- Developed a microservices-based application to explore service-oriented architecture concepts.
- Implemented modular backend services communicating through REST APIs.
- Explored asynchronous communication using RabbitMQ.
- Containerized services using Docker to support scalable development environments.
- Gained practical experience with distributed system design principles.

EDUCATION

BSc (Hons) in Software Engineering

2022 – Dec 2026 (Expected)

SLTC Research University

G.C.E. Advanced Level (Engineering Technology Stream)

2020

Engineering Technology, Science for Technology, Information and Communication Technology (ICT)

CERTIFICATIONS

- Full Stack Web Development Course – Skyrek Academy (Ongoing)
- Diploma in English Language – British Way English Academy

LEADERSHIP & ACHIEVEMENTS

Leo Club – SLTC Research University

- Awarded Best Project for “HEENA DIGE” at A2CON’24 – Leo District 306 A2.
- Received Best Project Chairman Award – Leoistic Year 2023/24.
- Led and managed multiple community service initiatives and award-winning projects.
